Hello there! Before talking about qualifications and professional abilities, I would like to introduce myself. Hello, my name is Lahiru Dilhara, I am from Sri Lanka.

I am working as a graphic designer and have been working in this field with having a strong background in Adobe Photoshop

I've been roaming around in this sector for about 6+ years and am a pro at understanding the recent demands and techniques for the best quality of image, its development, and transparency.

Besides, I have the awareness of the competitive business environment and can think creatively, and can develop new designs, concepts, and layouts that fit the clients' needs which will stand out from the competition. I have exceptional knowledge of colors, images, text style, and layout and can develop designs for small businesses, large corporations, and individuals. I always keep up to date with industry-leading software and technologies that means I have up-to-date knowledge of Design Photoshop.

My Skills

Photoshop

Logo Design

Graphic Design

Graphics

Business Cards

Word Press

So, I've gone through your job circular about hiring a graphic designer with higher requirements and I would like to apply for that vacant post as I have possessed all the requirements you've asked for.

Also, I can assure you of the best works and best position in this very competitive workstation only if you provide me the golden opportunity.
